

Tennis Court Lights

The light switches are contained within a waterproof box located at the foot of the steps down from the Lennox Street path.

To access the switches you need to use the panel key which is attached to the lower column supporting the handrail by the steps.

Each court has separate on (green) and off (red) single press switches – court 1 at the top, court 4 at the bottom.

You should only switch on the lights for the court you are about to use and you must turn the lights off at the end of your game unless other members present are waiting to use your court.

IMPORTANT: The door to the box must be closed and locked immediately after you have opened it to switch lights on or off.

This is essential to prevent rain water getting into the box. You will need to push the door closed in order to lock it fully.

The lights will automatically switch off at 10 pm (9pm during winter)
